

FOR IMMEDIATE RELEASE

Transplace Selected by Cummins Power Generation and Cummins Emission Solutions as Lead Logistics Provider

Global power leader and Transplace commence logistics relationship focused on North American transportation network

March 11, 2008 (Plano, TX) – Transplace, a leading provider of transportation management services (TMS) and logistics technology, today announced it has been selected by Cummins Inc., a corporation of complementary business units that design, manufacture, distribute and service engines and related technologies, as its lead logistics provider for the Power Generation and Emission Solutions Business Units.

Transplace, through a unique applied combination of technology, optimized processes and human capital will assume the daily transportation management of Cummins Power Generation and Cummins Emission Solutions respective supply chains – from raw materials/sub-assembly suppliers through distribution and to customer final delivery. Transplace’s on demand TMS will be employed for shipment planning, optimization, execution, tracking and visibility, and the establishment of a set of logistics management best practices to monitor and measure the performance of Transplace’s transportation network as well as specific supplier compliance metrics associated with Cummins’ raw material suppliers.

“We were looking for a logistics provider that could help manage our transportation needs and increase efficiency and visibility throughout our supply chain,” said Adam Hall, Director of Global Supply Chain Solutions for Cummins Power Generation. “Transplace brings experience, industry knowledge and an innovative approach that we believe will provide improvements to our transportation planning, execution, administration and management to yield significant shipment velocity and cost savings.”

Cummins Emission Solutions business unit believes there is a direct advantage from Transplace’s TMS solutions offerings. “Being a business unit with aggressive future North American growth plans, we can benefit from the expertise, process discipline, carrier management and freight optimization that Transplace brings to Emission Solutions,” said Warren L. Duffett, C.P.M., Director of Supply Chain Management for Cummins Emission Solutions.

Cummins conducted a rigorous review and selection process in pursuit of a lead logistics provider, interacting with several qualified providers before choosing Transplace over other leading logistics solutions providers.

“We’re very pleased to see this industry leading global company recognize the value of our people, processes and technology,” said Tom Sanderson, Transplace’s president and CEO. “Our managed services solution will provide visibility and improved management of Cummins’ transportation processes to help them achieve their goals, not just today, but well into the future.”

About Cummins

Cummins Inc., a global power leader, is a corporation of complementary business units that design, manufacture, distribute and service engines and related technologies, including fuel systems, controls, air handling, filtration, emission solutions and electrical power generation systems. Headquartered in Columbus, Indiana (USA), Cummins serves customers in more than 160 countries through its network of 550 company-owned and independent distributor facilities and more than 5,000 dealer locations. Cummins reported net income of \$739 million on sales of \$13.05 billion in 2007.

About Transplace

Transplace is a non-asset based third-party logistics (3PL) provider offering manufacturers and retailers the optimal blend of logistics technology and transportation management services. From complete logistics management outsourcing to intelligent transportation management systems (TMS) to supply chain network planning and design to high-quality brokerage services, Transplace has proven the ability to deliver both rapid return on investment and consistent value to customers. The company is recognized among the elite 3PLs in North America by a customer base that includes many of the largest shippers in the world.

In 2007, Transplace was awarded with the *Global Logistics and Supply Chain Strategies* “100 Great Supply Chain Partners” distinction for the fourth consecutive year and by *Supply & Demand Chain Executive* as a “Top 100” provider in supply chain transformation for the third consecutive year. Transplace was also recognized by *Inbound Logistics* as a Top 10 3PL for the fifth consecutive year, and it was awarded *Logistics Management’s* Quest for Quality award for the 3PL category.
