

TRANSPLACE Brokerage

Transplace offers the easiest, most cost-effective and dependable transportation solution. Unlike asset-based capacity providers - where the main priority is the utilization of their own company's assets - Transplace's main objective is to provide shippers with needed capacity and, at the same time, remove the hassle of obtaining transportation services.

Because of solid, long-term relationships with thousands of shippers and carriers, Transplace has the flexibility to successfully manage a shipper's unexpected volume increases and provide extra capacity whenever drastic volume peaks occur. By using superior technology and communication, Transplace can offer all of this at competitive rates, with pricing established up-front, and honor any carrier requests.

Transplace's experienced transportation representatives manage all shipments with a commitment to excellence, backed by operations support, to ensure compliance with shipper requirements.

Transplace provides capacity for:

- Dry van
- Flatbed
- Reefer
- International container
- Intermodal
- Less than truckload
- Expedited team transit
- Special handling shipments

Transplace's experienced transportation representatives manage all shipments with a commitment to excellence, backed by operations support, to ensure compliance with shipper requirements.

With Transplace's qualified transportation representatives, you can expect:

- Exceptional, personalized service with a commitment to integrity
- Operational expertise
- Rapid response to just-in-time and surge requests
- Professional handling of freight with complete accountability
